Mr. Harvey Namm, President  
Artistic Surfaces  
4100 N. Powerline Road, Y-2  
Pompano Beach, FL 33073

Dear Harvey,

On behalf of Gerrits/Klewin, I would like to thank you and your staff for your performance at the new Christine E. Lynn College of Nursing building for Florida Atlantic University. The complementary colors combined with the installation crew's ability to replicate the interior designer's complex patterns dramatically add to the beauty of what we feel is now the premier building on FAU's Boca Raton campus.

At the outset of this project our superintendent and myself had never been involved on a job with an epoxy terrazzo floor. We would like to thank you for personally giving us a tour of one of your other installations in progress, so that we could get a first hand look at the process. This educational field trip allowed us to more effectively schedule your work for the appropriate time. Also, we believe the literature and personal knowledge you provided to us on crack-suppression and concrete slab preparation will ensure the floor maintains its beauty for many years.

Finally, we truly appreciate Artistic Surface's cooperation in following our phasing strategy for this project, which required you to remobilize your crew several times over the course of construction.

If I should ever again be involved with a project requiring a terrazzo floor I would not hesitate to call upon Artistic Surfaces, and I would also gladly recommend your firm to anyone else in need of this product.

Sincerely,

Gerrits/Klewin, A Joint Venture  
Brian K. Allen, Project Manager
