

ARTISTIC SURFACES

The W Hotel & Resort Miami Beach, Florida

Artistic Surfaces, has recently completed the magnificent lobby space at the acclaimed W Hotel & Resort, South Beach. The design was strongly influenced by art deco elements consisting of sleek floors utilizing white epoxy terrazzo patterned with black plastic strips creating 184 perfectly symmetrical oval globes that interfaces flawlessly with each other. This installation is a master of craftsmanship installed

on "hands and knees" to achieve a finished creation with remarkable accuracy and detail. Only with terrazzo can an application of such magnitude be achieved. The lobby's designer Anna Busta of Studio B Design have combined organic architectural elements with a contemporary design to create this iconic, high-end design.

The Fontainebleau Hotel & Resort Miami Beach, Florida

Artistic Surfaces, received the 2009 Craftsmanship Award for the Fontainebleau Hotel from The National Terrazzo and Mosaic Association (NTMA), the governing body in the terrazzo industry ensuring quality, and excellence. Upon entrance into The Fontainebleau Hotel immediately you are overcome by the "WOW" sensation. The eyes gaze for a focal point within the gleaming environment while stimulating all of your visual senses. This application was created utilizing solid pieces of white Krystal glass slabs, broken by hand into small pieces, sorted by size, and strategically placed piece by piece. Epoxy

resin mixed with aggregate is poured to fill the field areas and ground to complete the design. The hotel owners, architects and discerning individuals "LOVE" the final results and are captivated by this truly "ONE OF KIND" application.

Artistic Surfaces has moved to a new location.

Why?

Polished Concrete

floor plan is a distinctive way to achieve a beautiful, elegant appearance while designing for sustainability. Artistic Surfaces concrete applications result in a surface that is unique, durable, and easy to maintain. Ground & Polished floors contains no VOC's, so it may help earn LEED points under the Low Emitting Materials credit 4.2 of the Indoor Environmental Quality Section. For more information on how to achieve LEED points for your floors, email info@artisticsurfaces.com.

Incorporating an integrally colored Ground & Polished concrete floor into your interior

We are excited about JobSite123 and the Qual-Port feature which allows all subcontractors in all 16 CSI divisions to showcase their companies. Visit www.jobsite123.com today to create a Qual-port for your company and use this tool to market your firm to all of the GC's in our South Florida Marketplace. Once you set up your Qual-Port, request Artistic Surfaces as an industry connection.
